

JOÃO DAVI SOUZA FARIAS

DATA QUALITY INTERN | DATA ANALYTICS | DATA SCIENCE

joaodavisouzafarias@gmail.com • +55 (73) 99975-1021 • [linkedin.com/in/joaodavisouzafarias](https://www.linkedin.com/in/joaodavisouzafarias)

PROFESSIONAL SUMMARY

Information Systems student and Data Quality Intern with experience in data validation, profiling, analysis, and database quality. Hands-on experience with Python and SQL for data cleaning, exploratory analysis, customer segmentation, clustering, and data visualization. Previous academic background in Economics, with strong interest in statistical modeling, machine learning, and business analytics.

SKILLS

Data & Analytics: Python, Pandas, SQL, PostgreSQL, Data Analysis, Exploratory Data Analysis, Data Cleaning, Data Quality, Data Profiling, Data Validation, Data Visualization, Customer Segmentation, Clustering, Multivariate Analysis, Microsoft Excel.

Tools: Git, GitHub, Power BI.

Professional: Problem Solving, Technical Support, Analytical Thinking, Technical Documentation, Clear Communication, Teamwork, Continuous Learning, Time Management.

PROFESSIONAL EXPERIENCE

Data Quality Intern | [Stringhini Varejo Inteligente](#)

April 2026 – Present

- Ensure data accuracy, consistency, and integrity across database systems and retail analytics dashboards.
- Perform data profiling, auditing, and cleanup tasks to detect anomalies and resolve quality issues.
- Collaborate with cross-functional teams to enforce data quality standards and optimize reporting workflows.

Data Analyst | [Academic & Personal Projects](#)

January 2025 – Present

- Performed customer segmentation on the Online Retail dataset using clustering and multivariate analysis to identify distinct behavioral customer groups.
- Applied Monte Carlo simulation to evaluate the stability and consistency of customer segmentation results.
- Used Python, Pandas, and SQL for data cleaning, exploratory data analysis, and analytical workflows.
- Developed data visualizations and documented analytical methodologies to communicate actionable insights and ensure reproducibility.

SELECTED DATA SCIENCE PROJECTS

Customer Segmentation | Online Retail Dataset

- Applied clustering and multivariate analysis to segment customers and interpret behavioral patterns.
- Used Monte Carlo simulation to assess the stability of the resulting segmentation.

Scientific Research | Social Media Data Analysis

- Collected, treated, and analyzed social media publications to identify patterns relevant to the research objectives.

EDUCATION

B.S. in Information Systems

2025 – Present

State University of Southwest Bahia (UESB)

B.A. in Economics (Incomplete)

March 2023 – April 2024

State University of Santa Cruz (UESC)
